

Assessment

It is important to assess our learning as we go and also at the end, to make this more effective:

- Teachers give a variety of feedback
- Pupils act upon feedback supported by teachers
- Assessment is used as a tool for learning
- Transferable skills are recognised through assessment

Learning and Teaching

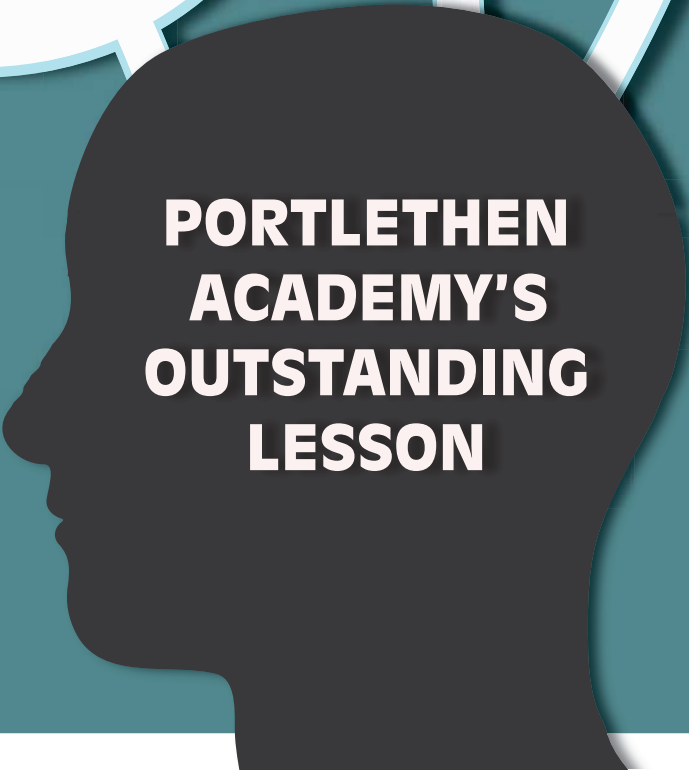

To help learning go smoothly:

- Teachers move around the room
- Pace and Challenge is appropriate for all learners
- Lessons are well structured and split into a variety of activities
- Pupils are responsible for their own learning
- Pupils are aware of why they are learning this and what happens next

Procedure and Structure

When you walk into a classroom you should see:

- Pupils settled, organised and ready to work
- Any behaviour issues being dealt with quietly
- Positive relationships within the class
- Pupils who are aware of what they are learning and how to succeed at it
