

Dear Parents/Carers,

We have been advised by the NHS Grampian Health Protection Team (HPT) that there has been a detected case of COVID-19 linked with Portlethen Academy. .

The person affected was not in school 48 hours prior to developing symptoms. Nevertheless, we know that you may find this concerning and we are continuing to monitor the situation and work closely with HPT. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

Anyone who has been in direct contact with the detected case have been contacted by the Test and Protect service and they have been asked to self-isolate for 14 days.

The school remains open and your child should continue to attend if they remain well and have not already been advised by Test and Protect to self-isolate.

We have been hugely impressed by just how well our young people have followed the advice and guidelines we have in place and we would urge them to continue to follow these at all times along with the wider advice for when they are out of school. It has been fantastic having them back in school since August and we want that to continue so must avoid any complacency.

### **What to do if your child develops symptoms of COVID 19**

If your child develops symptoms of COVID-19, they must not come to school. Anyone with symptoms will be eligible for testing and further information on testing can be found on [NHS Inform](#). They should begin 10 days of self-isolation whilst waiting for test results.

All other household members who remain well must stay at home and begin 14 days of self-isolation. The 14-day period starts from the day when the first person in the house became ill. Household members should not go to work, school, public areas or use public transport. <https://www.gov.scot/publications/coronavirus-covid-19-test-and-protect/pages/who-needs-to-self-isolate/> Household members self-isolating for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If your child's result is negative, they can return to school when they feel well and have had no fever for 48 hours (without needing paracetamol.) The household isolation can be lifted.

If your child's result is positive, you will be contacted by Test and Protect and advised accordingly.

### **Symptoms**

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature
- a loss of, or change in, normal sense of taste or smell (anosmia)

**For most people, coronavirus (COVID-19) will be a mild illness.**

If your child or anyone in the household does develop symptoms, you can seek advice from [NHS Inform](#).

### **How to stop COVID-19 spreading**

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

#### *Do*

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

### **Further Information**

Further information is available at:
