

Feedback

It's basically advice

Who Can Use Feedback?

Everyone, in all parts of life.
School, sports, work, projects

So, where can I get some of
this sweet feedback from?

- Teacher or Coach
- Your friends and classmates
- Yourself

How do I make the best use
of feedback?

- Make an effort to listen to what is being said, or watch what is being shown to you
- Don't be negative towards yourself!
- Make a note (mentally or real)
- Act on it, and keep practicing
- Check in to see if you're improving

Feedback in Maths

- How to recognise it
- The resources you have to act on it

From Your Teacher

- An instruction to the whole class
- Something they said to you during a lesson
- Something written in your jotter/homework
- Results of an assessment/homework marking
- Praise, positive feedback
- Reports and Parents evenings

From Your Classmates

Peer marking

Comparing your work in class

Working on a homework together

Ask them to check your form

It doesn't actually help to compare scores because someone else's score doesn't give you any info on what you need to do.
Try comparing your working with each other.
What did they do differently?

From Yourself

When the teacher is talking to the whole class think about whether you do this

Check your answers at the back of the book

Check your working against notes or examples from your teacher

Look back through the questions you get wrong on Manga High/MyMaths

Try to recognise areas which you are unsure about and keep a note of them

Acting on Feedback in Maths

There are so many resources for you!
